

Study	UFPTI 0607-CH01: A Clinical Outcomes Protocol of Proton Beam Radiation Therapy for Chordomas and/or Chondrosarcomas of the Base of Skull and/or Spine
Principle Investigator	Robert S. Malyapa, MD, PhD
Contact	Amanda Prince, RN, CCRP aprince@floridaproton.org ; (904) 588-1298
Additional Info	http://www.floridaproton.org/contact/contact-clinical-trials.html (877) 686-6009
Institution	University of Florida Proton Therapy Institute
Recruitment Status	1. Study Start Date: 2. Estimated Primary Completion Date: 3. Estimated Study Completion Date: 4. Estimated Enrollment:
Study Purpose	
Primary Aims	1. Collect and analyze tumor control outcomes
Secondary Aims	1. Collect and analyze outcome data on normal tissue morbidity: <ul style="list-style-type: none"> · pituitary function · visual function · hearing function
Methods	Radiation dose and fraction scheme per standard of care
Eligibility	1. Histologically proven chordoma or chondrosarcoma. 2. Primary tumor site arising from base of skull (sphenoid, clivus, petrous, basi-occiput) and/or spine.
Exclusion Criteria	1. Evidence of distant metastasis. 2. Previous radiation to the head and neck or brain that would compromise the ability to deliver the prescribed treatment.
